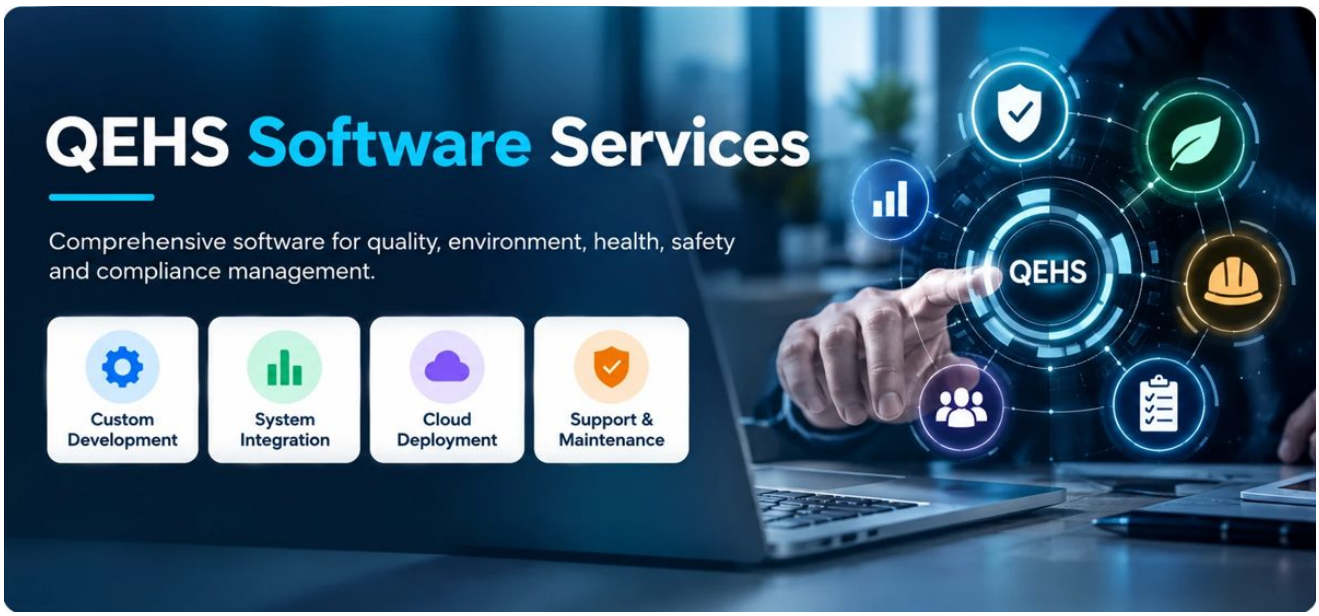
QEHS Software Services

Customized software for quality, environment, health, safety and fire-service organizations.



Tailored Software Solutions for Quality,Environment, Health ,Safety and Fire Agencies

About Us

We provide software solutions to empower organizations with innovative tools that streamline operations and enhance efficiency. We specialize in delivering customized software solutions to meet the unique needs of Quality,Environment,Health,safety (QHES) And Fire agencies.

Service Overview

We understand the specific challenges faced by QHES and Fire agencies, including regulatory compliance, data management, monitoring, and reporting. Our tailored software solutions are designed to address these challenges effectively, ensuring operational excellence and regulatory adherence.

Key Software Solutions We Provide

Solution	Features	Benefits
Quality Management Systems (QMS)	Streamlined document control and version tracking. Real-time monitoring of quality metrics. Automated workflows for audits and compliance management. Integration with ISO 9001:2015, Six Sigma, and other quality standards.	Reduce operational errors and non-conformities. Enhance accountability and process efficiency.

Solution	Features	Benefits
Environmental Management Systems (EMS)	Monitoring of environmental impact metrics (e.g., emissions, waste). Real-time tracking of sustainability goals and initiatives. Compliance management for ISO 14001:2015 and other environmental standards. Data visualization and reporting tools for stakeholders.	Minimize environmental risks. Ensure compliance with environmental regulations.
Health and Safety Management Systems (HSEMS)	Incident reporting and root cause analysis. Risk assessment tools with proactive mitigation plans. Compliance tracking with OSHA, ISO 45001:2018, and similar standards. Employee training and certification tracking.	Improve workplace safety and reduce accidents. Ensure compliance with health and safety regulations.
Data Management and Analytics	Centralized data storage for QHE metrics. Advanced analytics for trend identification and forecasting. Custom dashboards for real-time insights.	Enhance decision-making with accurate data. Reduce manual data handling and errors.
Compliance and Audit Management Software	Automated scheduling and tracking of audits. Real-time compliance status updates. Comprehensive audit trails and reporting.	Simplify regulatory audits and inspections. Maintain compliance with ease.
Custom Solutions Development	We work closely with your agency to develop bespoke solutions tailored to your specific requirements, ensuring alignment with your operational goals and industry standards.	

Why Choose Us?

Industry Expertise

Extensive experience in developing solutions for QHE-focused agencies.

Customization

FAQ

Q. What software does MLC develop?

Customised software for quality, environment, health, safety and fire organisations: QMS, EMS, health and safety management, data analytics, and compliance and audit management tools.

Q. What can the health and safety software do?

Incident reporting with root cause analysis, risk assessment tools, compliance tracking against OSHA and ISO 45001:2018, and tracking of employee training and certification.

Q. Can the software support ISO standards?

Yes. Solutions can support ISO 9001:2015 document control and audits, ISO 14001:2015 compliance management and ISO 45001:2018 compliance tracking.

Q. Can MLC build something specific to our organisation?

Yes. MLC develops bespoke solutions with your team, aligned to your operational goals and industry standards.
