Five Star Integrated Audit

Our Five Star Safety, Health and Environmental (ISHE) Audit provides an integrated audit process, which combines all the features and primary components of the Five Star Occupational Health and Safety

Our Five Star Safety, Health and Environmental (ISHE) Audit provides an integrated audit process, which combines all the features and primary components of the Five Star Occupational Health and Safety and Environmental Audit into one product.

What is it?

Best practice, quantified, in depth examination of an organization's entire integrated safety, health and environmental management system and associated arrangements.

The audit goes far beyond the requirements of established standards such as ISO 45001:2018 and ISO 14001:2015 by assessing safety, health and environmental management systems (and associated arrangements) against current best practice techniques and current trends.

The audit will help you demonstrate the excellence of your integrated SHE management system to customers, supply chain and other stakeholders and will support continual improvement strategies.

Who is it for?

This audit is designed for any organization that has implemented, or is working towards a fully integrated safety, health and environmental management system.

Organizations within any sector (of any size) who:

- a. require a status assessment of their current IMS against best practice
- b. require a structured route toward best practice status.

The audit is best suited to organizations that require a detailed and objective evaluation of their SHE system in one comprehensive process. The audit measures performance against key performance indicators (leadership and continual improvement), identifies areas of positive/negative practice and provides a structured approach to continuous improvement.

Why the audit is right for your organization

- External recognition of the H&S and EMS to best practice standards
- Demonstration to stakeholders and other interested parties (including regulatory bodies) of commitment toward health, safety and environmental responsibility
- Structured route toward continual improvement and best practice standards

What are the key areas of the audit?

- Six best practice indicators
- Four sections
- Sixty-two (62) elements

How does it work?

- On-site review of relevant documentation
- Interviews/discussions with relevant stakeholders (including top management)
- Operational sampling

What your organization will get from the audit

- Detailed report
- Detailed recommendations and action planning
- Quantified outcome in all 65 elements
- Benchmarking across different aspects of the specification
- Eligibility for Sword of Honour (if five-star achievers)
- Certification of achievement

Why choose us?

- Our audit and consultancy products are regularly reviewed to meet customer needs, expectations, and sector best practice
- Consistently high standards of service are achieved through a robust quality assurance process including auditor standardization, training, and performance monitoring
- Our technical specialists serve on strategic committees for occupational health, safety, environmental, and wellbeing standards
- We have a unique internationally recognized best practice (Five Star) audit process
- Industry recognition from awards such as the prestigious Shield, Sword, or Globe of Honour
